

Chapter 18 – Chemotherapy

A fee for consultation may be charged before treatment commences. Further consultation fees should not be charged during treatment.

These codes cover all care relating to the clinical supervision and planning of the delivery of chemotherapy regimens and the engagement and management of patients, including but not limited to:

- regime prescription;
- supervision of planning and treatment delivery;
- expected side effects management and the prescription of an alternative regimen; and
- supervision of all outpatient, daypatient, and inpatient care, including any transfusion of blood or blood products.

Only one supervision fee will be paid for any course of treatment regardless of whether a single or multiple drug combination is used. We expect invoices for chemotherapy and biological supervision to be submitted at the end of the cycle of treatment.

For the avoidance of any doubt, only one code from X0001, X0002, X0003, X0004, or X0005 should be used to encompass the complete regimen of chemotherapy.

Last updated: October 2024.

18.1 Chemotherapy

CCSD	Description	Specialist fee	Anaesthetist fee
A5480	Intrathecal chemotherapy	£100.00	£0.00
